 III **TOP DOCTORS**

When you experience pain in your hips, knees and shoulders, you want relief. These areas of your body are so crucial to your quality of life that even the slightest stiffness can affect your movements, and therefore your ability to enjoy life. **Because living with pain isn't really living!**

That's why Robert J. Zehr, M.D., founded the Zehr Center for Orthopaedics, bringing to each patient's surgical problem the most up-to-date techniques, patient safety and knowledge of rehabilitation gained from the experience of more than 5,000 primary, revision and complex joint reconstructions.

Dr. Zehr was one of the first, and is still one of the few surgeons in Southwest Florida to perform total hip replacement surgery using the "direct anterior approach," a method that provides four distinct benefits to patients:

- Faster recovery with less pain
- Most minimally invasive surgical approach to the hip
- No restrictions to post-operative movement
- Increased stability through a more accurate placement of the prosthesis

Dr. Zehr's mastery of minimally invasive surgical techniques, rapid-recovery rehabilitation protocols and shortened hospital stays have resulted in greatly improved surgical outcomes, fewer complications and highly satisfied patients. Shouldn't you be one of them?

Consistently chosen for numerous awards, Dr. Zehr is also an internationally recognized author, lecturer and teacher. He has surrounded himself with a highly skilled and passionate team of clinical professionals. The Zehr Center for Orthopaedics was established to provide world-class medical care. Don't you deserve it?
